

Traffic Speed and Volume Data Capture Exercise

Villagers are probably aware that the 50MPH zone on the A509 was extended from near the Filgrave turn to just past the junction of the A509 and Sherington High Street. Unfortunately the change of speed limit order did not reflect the speed on the High Street from the A509 to just before the houses start is 60MPH, thereby creating an anomaly of different speed limits. MKCC are considering extending the 50MPH limit to the start of the 30MPH areas on the High Street and Gun Lane. To capture the volume of traffic and the speeds driven, strips will be laid as shown in blue on the diagram below. This will occur in w/c 5th June and the strips will be there for about a week.

Further update to follow when the data captured has been analysed by MKCC and Thames Valley Police.
